## DETAILED ACTION

1. An Applicant's Request for Continued Examination (RCE) filed on June 14, 2004 has been entered. Based on the RCE, an Applicant's Amendment filed on April 13, 2004 has been entered. Claims 3 and 6 have been amended. Overall, claims 1-8 are pending in this application.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office Action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakayama et al. (Japan Publication 6-159073).

Re claim 3, as shown in Figure 2, Nakayama et al. disclose an exhaust passage structure in an outboard engine system having a swivel shaft (20) for steering of the outboard engine system in which a catalytic converter (111) for purifying an exhaust gas discharged from an engine (15) is mounted in an exhaust passage for guiding the exhaust gas, the exhaust passage structure comprising:

- at least a portion (114) of the exhaust passage integrally formed in a case member (12a), which is disposed under an engine block (15) to accommodate a drive shaft (20) therein for

Art Unit: 3748

transmitting a driving force from the engine (15) to a propeller (13), the case member being connected to said swivel shaft (20); and

- a connection (108) into which the exhaust passage opens, the connection being formed in a sidewall of the case member (12a);

wherein the catalytic converter (111) is disposed in a space surrounded by the case member (12a) and an exhaust passage-defining member (110a, 110b) so as to be held by the exhaust passage-defining member, the exhaust passage-defining member (110a, 110b) being detachably coupled to the connection (108) of the case member to permit the exhaust gas to flow thereinto.

Re claim 4, in the exhaust passage structure of Nakayama et al., the catalytic converter (111) is supported on the exhaust passage-defining member (110a, 110b).

Re claim 5, in the exhaust passage structure of Nakayama et al., the catalytic converter (111) receives the exhaust gas flow from the case member (12a) via an opening (108) in the exhaust passage-defining member (110a, 110b) communicating with the connection.

Re claim 6, as shown in Figure 2, Nakayama et al. disclose an exhaust passage structure in an outboard engine system having a swivel shaft (20) for steering of the outboard engine system in which a catalytic converter (111) for purifying an exhaust gas discharged from an engine (15) is mounted in an exhaust passage for guiding the exhaust gas, the exhaust passage structure comprising:

- at least a portion (114) of the exhaust passage integrally formed in a case member (12a), which is disposed under an engine block (15) to accommodate a drive shaft (20) therein for transmitting a driving force from the engine (15) to a propeller (13); and

- a connection (108) into which the exhaust passage opens is formed in a sidewall of the case member (12a);

wherein the catalytic converter (111) is disposed in a space surrounded by the case member (12a) and an exhaust passage-defining member (110a, 110b) so as to be held by the exhaust passage-defining member, the exhaust passage-defining member (110a, 110b) being detachably coupled to the connection (108) of the case member; and

wherein the exhaust passage-defining member (110a, 110b) includes an opening (108) to permit the exhaust gas to flow thereinto.

With regard to the preamble directed to a 4-cycle engine, a preamble to a claim is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self contained description of the structure not depending for completeness upon the introductory clause. See *Kropa v. Robie, supra at 480*. See also *Ex parte Mott*, 190 USPQ 311, 313 (PTO Bd. of App. 1975). Clearly, the pending claim 6 does not rely on the preamble for completeness.

***Allowable Subject Matter***
